
What is Built-to-Suit (BTS)?

Built-to-Suit (BTS) is a customized infrastructure model where we **design and construct cold chain warehouses based on your exact operational requirements.**

Whether you need:

- Blast freezing
- Ambient storage
- Multi-temperature zones
- Pharma-grade compliance

We deliver **fully optimized cold storage solutions** aligned with your business goals.

BT – Build & Transfer Model

We design and construct your **cold storage warehouse from the ground up**, including Cold room, ambient zones, and operational spaces then transfer full ownership to you.

This model gives you **complete control over your infrastructure**, while we handle the complexity of design and execution.

Best for: Businesses seeking long-term ownership and control

Includes: Design, engineering, construction, and handover

Delivered for: Flipkart

(Client logo placement)

BOT – Build, Operate & Transfer Model

We build your facility, manage **end-to-end cold chain operations**, and transfer it to you once the system is stabilized and optimized.

This ensures a **smooth transition from setup to self-managed operations**, without the burden of initial operational challenges.

Best for: Companies that want to avoid operational complexity

Advantage: Expert-led operations with seamless transition

(Client logo placement if applicable)

Build + 3PL (Third-Party Logistics) Model

We develop your warehouse and integrate **third-party logistics (3PL services)** to handle inbound, outbound, inventory, and documentation.

This creates a **fully managed cold chain ecosystem**, ideal for businesses with high-volume logistics requirements.

Best for: E-commerce, food, and FMCG industries

Includes: Storage, logistics operations, and inventory management

Delivered for: Amazon, Falcon

(Client logos placement)

Build & Lease Model

We construct the warehouse and lease it to you, allowing you to operate without heavy capital investment.

This model enables **faster expansion with lower upfront costs**, making it ideal for rapidly growing businesses.

Best for: Quick commerce and high-growth companies

Advantage: Asset-light, scalable, and flexible

Delivered for: Zepto

(Client logo placement)

Cold Room Solutions (For Existing Facilities) Model

Already have a warehouse or facility? We convert your existing space into a **fully functional cold storage system** using advanced insulation, puff panels, and refrigeration technology.

This model is ideal for **multi-product and multi-client storage**, offering flexibility without the need for new construction.

Best for: Businesses with existing infrastructure

Advantage: Cost-effective, modular, and scalable

Locations Delivered: Kolkata, Noida
(Client logos placement if applicable)

Which Model is Right for You?

- Want full ownership of your warehouse? → **BT – Build & Transfer**
 - Want us to manage operations initially? → **BOT – Build, Operate & Transfer**
 - Need complete logistics support? → **Build + 3PL**
 - Expanding fast with minimal capital investment? → **Build & Lease**
 - Already have a facility to convert? → **Cold Room Solutions**
